Autonomy Syllabus Scheme-II B

Bachelor of Technology in

Artificial Intelligence and Data Science (AI-DS)

Third Year

(Semester VI)

Including

Honors Degree Program &

Internship Policy Manual

With effect from

A.Y. 2024-25

From the Principal's Desk:

The challenges and demands of the dynamic industry increasingly require technocrats to be skilled, adaptive, and innovative. The National Educational Policy 2020 (NEP 2020) framed by the Government of India intends to induce a paradigm shift by re-conceptualising the higher education. Recent academic reforms recommended by the AICTE and UGC have also effectually upscaled the higher education system in India. It is further the role of HEIs to offer high-quality educational opportunities and enable the next generation to succeed globally. Hence, to adhere to the status quo, and enhance the academic standards and quality of engineering education further, it is essential to assimilate innovation and recurrent revision in curriculum, teaching-learning methodology, examination, and assessment system.

K. J. Somaiya Institute of Technology (KJSIT), being an autonomous institute possesses more flexibility in adapting newer approaches to reach higher levels of excellence in engineering education. The Syllabus Scheme – I implemented under the academic autonomy conferred to KJSIT w.e.f. Academic Year 2021-22 already comprises of state-of-the-art courses and laboratory sessions on emerging areas of technology. With an ideology that the root of innovation is 'interest', the curriculum offers a wide range of elective courses — grouped into core and inter-disciplinary domains. At par with international engineering education, it follows a learner-centric approach, where the students could choose to study courses concerning areas of their interests.

This curriculum introduces Skill-Based Learning (SBL), Activity-Based Learning (ABL), and Technology-Based Learning (TBL) as eXposure (SAT) courses — that assure X factor in all the students of the institute. These SAT courses, practiced across the first three years of engineering, focus on graduate attributes like work responsibilities towards society, problem-solving ability, communication skills, motivation for life-long learning, leadership and teamwork, etc. which cannot be copiously imbibed through regular engineering courses. The inclusion of induction program for the First Year students is deliberated as per the guidelines of AICTE and helps students belonging to diverse backgrounds to adjust in the new academic environment.

However, sustained initiatives are required to assure efficiency, academic excellence, and growth. Hence, KJSIT Syllabus Scheme – II was introduced with 03 newer dimensions to Scheme – I: Internship, SBL of Foreign and Indian Languages, and Honours Degree — for implementation w.e.f. from Academic Year 2022-23 across all the branches and all 04 years of engineering.

1. **Internship:** Firstly, the redesigned Scheme – II incorporates mandatory Internship for all the students, which is to be pursued during all 04 years of graduation. Based on the AICTE Internship Policy, this initiative shall enable graduates to respond to the current needs of the industry and equip them with skills required at national and global level. The students shall gain practical understanding and training on cutting-edge technologies and industry practices in a suitable industry or organization. While innovation and entrepreneurship are emerging as fulcrums of higher education, the internship will also provide an exposure to innovation, entrepreneurial, and incubation opportunities through various related activities, and instill a start-up spirit in the students.

Further, the students of KJSIT already have an exposure to the work culture and trends in industries through live / collaborative projects / product developments, etc. and they often contribute significantly to the society through various projects. Under autonomy too, through the component of Project-Based Learning included in the syllabus, the students develop Mini, Minor, and Major projects in Second, Third, and Last Year respectively concerning healthcare, agriculture, societal / industrial need-based problems, etc. Through duality of Major Project development and newly introduced activities / components as a part of Internship, the students shall learn about research methodology, IP and IPR — resulting into generation of quality research articles, copyrights, and patents.

2. **Honours Program**: Another major initiative through the Scheme – II is the introduction of B.Tech. with Honours program for students who are desirous of pursuing focused interest in 06 emerging areas of technology recognized by AICTE: Internet of Things, Artificial Intelligence & Machine Learning, Cyber Security, Virtual and Augmented Reality, Data Science, and Blockchain. This Honours program is of

- high-end industry standards and shall offer multi-fold opportunities for the learners such as additional credits, specialization in the chosen domain, job-ready skills, multidisciplinary knowledge, etc.
- 3. **Foreign and Indian Languages**: As another initiative, the Skill-Based Learning (SBL) in Scheme II comprises of developing verbal and written communication skills in Foreign and Indian Languages, which is a blooming trend and future necessity for various career prospects. The students shall acquire these skills through MOOC courses, giving them opportunities to learn the target language from beginners to advanced level. Such SBL and TBL courses shall also acquaint students with skills of digital age learning from online platforms, along with time management ability, ethics, and professionalism.

The KJSIT Syllabus Scheme II B introduced and effective for Second Year from the Academic Year 2023-24, and progressively thereafter, represents a minor revision of Scheme II. Specifically, it includes a new Activity-based Learning (ABL) course on Interdisciplinary Informatics, to expose learners to opportunities and effectiveness by integrating informatics with diverse disciplines such as biotechnology, healthcare, agriculture, nanotechnology, earth sciences, and more. This SAT course aims to promote interdisciplinary Research and Development, which has been one of the major goals of the institute. The Scheme II B fosters a comprehensive understanding of both theoretical and practical aspects, which equips students with the skills necessary to excel in the ever-evolving technological landscape.

Through joint efforts of all stakeholders, newer initiatives, strategic planning, and efficient execution of neoteric educational practices with hi-tech wizardry, KJSIT is endeavouring to become a role model for all autonomous institutes across the nation.

Dr. Vivek Sunnapwar Principal and Chairman - Academic Council

Preface by Board of Studies in Artificial Intelligence and Data Science:

We, the members of Board of Studies of B. Tech in Artificial Intelligence and Data Science (AI-DS) are very happy to present Autonomy Syllabus Scheme-II B of Second Year and Third Year of B. Tech in Artificial Intelligence with effect from the Academic Year 2023-24. We are assured that you will discover this syllabus interesting and challenging.

AI-DS is one of the newest programme amongst engineering students. The syllabus focuses on providing a sound theoretical background as well as good practical exposure to students in the relevant areas like human intelligence and its applications in industry, defense healthcare, agriculture and many other areas. It is envisioned to deliver a modern, industry-oriented education in AI-DS. It aims at creating skilled engineers who can successfully acquaint with the demands of the industry worldwide. We have included internships under Autonomy Syllabus Scheme-II-B from SEM-II to SEM-VIII of B.Tech AI-DS. Now in the year 2024-25 this internship policy will be applicable to TY AI-DS.

In this course, the students may have career opportunities in healthcare, business, e-Commerce, social networking companies, biotechnology, genetics and other areas. We have mapped course outcomes, PBL outcomes, Skills outcomes, Activity outcomes and TBL outcomes module wise throughout the syllabus. Faculty in this program adopted collaborative, co-operative and online teaching learning techniques during coverage of the course; this will help students to understand each course in depth. The designed syllabus promises to achieve the objectives of affiliating University, AICTE, UGC, and various accreditation agencies by keeping an eye on the technological developments, innovations, and industry requirements.

We would like to show our appreciation to the faculties, students, industry experts and stakeholders assisting us in the design of this syllabus.

Board of Studies in Artificial Intelligence and Data Science are,

Course Code	Course Name	Credits (TH+P+TUT)				
AIC601	Artificial Neural Network	(3+0+0)				
Prerequisite:	rerequisite: 1. Knowledge of linear algebra, multivariate calculus, and probability theory					
	2. Knowledge of a programming language (PYTHON/C/C ++1	recommended)				
Course	1. To study basics of biological Neural Network					
Objectives:	2. To study the architecture, learning algorithm of ANN					
	3. To know the issues of various feed forward and feedback A	NN				
	4. To know application of ANN					
Course	After successful completion of the course students will be able	e to:				
Outcomes:	1. Explain the biological Neural Network and its architecture.					
	2. Evaluate different neural networks of various architectures	both feed forward and				
	feed backward and perform the training of neural networks rules.	using various learning				
	3. Analyze single layer perceptron and multilayer perceptron.					
	4. Perform the testing of neural networks and do the perform analysis of these networks for various pattern recognition applications.					
	5. Interpret the concepts of Associative memory networks					
	6. Apply the suitable neural network algorithms for real time a	pplication.				
	·

Continuous Assessment:

- Test-1, Test-2 and Average of T-1 and T-2 (30Marks): Test-1 and Test-2 consists of two class tests of 30 marks each.
- Test-1 is to be conducted on approximately 40% of the syllabus completed and Test-2 will be based on remaining contents (approximately 40% syllabus).
- Average marks of T-1 and T-2 will be considered.
- Internal Assessment (10 Marks): Internal assessment will be based on quizzes /case study/activity conducted by the faculty

- End Semester Exam shall be conducted for Total 60 Marks.
- Duration of End Semester Exam shall be 02 Hours 30 Minutes.

Lab Code	Lab Name	Credits (P+TUT)		
AIL601	Artificial Neural Network lab	(1+0)		
Lab	Vnowledge of a programming language (DVTHON/C/C + + rec	nommandad)		
Prerequisite:	Knowledge of a programming language (PYTHON/C/C ++ recommended)			
Lab	1. To study different activation functions.			
Objectives:	2. To implement a learning algorithm.			
	3. To implement different memory network algorithms.			
Lab Outcomes	After successful completion of the course students will be able	e to:		
(LOs):	1. Implement different activation functions used in ANN.			
	2. Implement different Neuron models.			
	3. Implement Single layer and multilayer perceptron network			
	4. Implement a self organized feature map network.			
	5. Demonstrate use of Associative Memory Network to calculate weight for given			
	pattern.			
	6. Case study on ANN.			

Lab. No.	Experiment Title	LO mapped	Hrs/Lab
1	Implement different Activation functions.	LO1	02
2	Implement McCulloch Pitts Neuron Model.	LO2	02
3	Implement Hebbian learning.	LO2	02
4	Implement Single layer perceptron neural network.	LO3	02
5	Implement Multi-layer perceptron neural network.	LO3	02
6	Implement Error Back propagation neural network.	LO3	02
7	Implement Kohonen Self-organizing Feature Maps.	LO4	02
8	Implement Auto Associative memory network.	LO5	02
9	Implement Hetero Associative memory network.	LO5	02
10	Case Study on ANN	LO6	-

Continuous Assessment:

- Test-1, Test-2 and Average of T-1 and T-2 (30Marks): Test-1 and Test-2 consists of two class tests of 30 marks each.
- Test-1 is to be conducted on approximately 40% of the syllabus completed and Test-2 will be based on remaining contents (approximately 40% syllabus).
- Average marks of T-1 and T-2 will be considered.
- Internal Assessment (10 Marks): Internal assessment will be based on quizzes /case study/activity conducted by the faculty

- End Semester Exam shall be conducted for Total 60 Marks.
- Duration of End Semester Exam shall be 02 Hours 30 Minutes.

Lab Code	Lab Name	Credits (P+TUT)
AIL603	Data Analytics and Visualization Lab	(1+0)
Lab	1. Discrete Structures	
Prerequisite:	2. Programming Language in Python or Java and R	
Lab	1. To implement visual perception.	
Objectives:	2. Apply core skills for visual analysis.	
	3. Apply visualization techniques for various data analysis tasks.	
	4. Design information dashboard.	
Lab	At the end of the course, the student will be able to:	
Outcomes	1. Implement R programming for Data Analysis.	
(LOs):	2. Apply techniques for data manipulation.	
	3. Implement data visualization with various techniques.	
	4. Perform visualization using D3.js	
	5. Apply ethical principles like timeliness and adhere to the rules of the laboration	ratory.

Suggested Practical List:

Lab. No.	Experiment Title	LO Mapped	Hrs/Lab		
1	To perform the basic mathematical operations in R programming	LO, LO2, LO5	02		
2	Implementation of vector and list data objects operations in R	LO1, LO2, LO5	02		
3	Implementation and perform the various operations on data frames in R	LO1, LO2, LO5	02		
4	To Create Sample (Dummy) Data in R and perform data manipulation with R	LO1, LO2, LO3, LO5	02		
5	Study and implementation of Data Visualization with ggplot2 in R	LO1, LO2, LO3, LO5	02		
6	To perform visualization using D3.js	LO1, LO2, LO3, LO4 , LO5	02		
7	To perform data exploration using Pandas	LO1, LO3, LO5	02		
8	To perform scatter plots in matplotlib and seaborn with Python	LO1, LO2, LO3, LO5	02		
9	Case Study on Data Visualization using Tableau	LO1, LO3, LO5	02		
10	Case Study-2	LO1, LO3, LO5	02		
Text Books:	 Hands-On Machine Learning with Scikit-Learn, Keras, and TensorFlow: Concepts, Tools, and Techniques to Build Intelligent Systems 2nd Edition Python Machine Learning: Machine Learning and Deep Learning with Python, scikit-learn, and TensorFlow 2, 3rd Edition

Term work:

- Term work should consist of a minimum of 8 experiments.
- Journal must include at least 2 assignments on content of theory and practical of the course "Data Analytics and Visualization".
- The final certification and acceptance of term work ensures satisfactory performance of laboratory work and minimum passing marks in term work.
- Total 25 Marks (Experiments:-20 marks, Assignments:-05 marks)

• P&O examination will be based on experiment list and performance of experiment.

Course Code	Course Name	Credits (TH+P+TUT)	
AIC604	Big Data Analytics	(3+0+0)	
Prerequisite:	1. Database Management System.		
	2. Data warehousing and Mining		
	3. Familiarity with Intermediate Python/R.		
Course Objectives:	1. To provide an overview of an exciting growing field of Big	Data analytics.	
	2. To discuss the challenges traditional data mining alg	orithms face when	
	analyzing Big Data.		
	3. To introduce the tools required to manage and analyze Big Data like Hadoop,		
	NoSql Map-Reduce.		
	4. To teach the fundamental techniques and principles in achieving Big Data		
	analytics with scalability and streaming capability.	o o	
	5. To introduce to the students several types of Big Data lik	e social media, web	
	graphs and data streams.		
	6. To enable students to have skills that will help them to solve complex real-		
	world problems in decision support.		
Course Outcomes:	1. The student will be able to explain the key issues in Bi	g Data management	
	and its associated applications.		
	2. Use Big Data frameworks and noSQL databases.		
	3. Apply Map-reduce algorithm in different scenarios.		
	4. Apply different algorithms to stream data model.		
	5. Apply classification algorithms and pattern mining for Big	Data.	
	6. Use Big Data Systems for AI solutions.	,

Continuous Assessment:

- Test-1, Test-2 and Average of T-1 and T-2 (30Marks): Test-1 and Test-2 consists of two class tests of 30 marks each.
- Test-1 is to be conducted on approximately 40% of the syllabus completed and Test-2 will be based on remaining contents (approximately 40% syllabus).
- Average marks of T-1 and T-2 will be considered.
- Internal Assessment (10 Marks):Internal assessment will be based on quizzes /case study/activity conducted by the faculty

- End Semester Exam shall be conducted for Total 60 Marks.
- Duration of End Semester Exam shall be 02 Hours 30 Minutes.

Course Code	Course Name	Credits (P+TU)
AIDLL6053	Internet of Things Lab (1+0)	
Lab Prerequisite:	1.Micro-controllers 2.Embedded System Design 3.Computer Networks	
Lab Objectives:	 Understand Arduino IDE for IoT practical. Implementation of Arduino board and Nodemcu interfact Ultrasonic, DHT sensors. Demonstration of IoT based case study. Implementation of data storage. Write accurate documentation for experiments performed. Apply ethical principles like timeliness and adhere to laboratory. 	
Lab Outcomes (LOs):	After completing practical student will be able to: 1. Use Arduino IDE for IoT based practical. 2. Implement interfacing of Arduino board and nodemound Ultrasonic, DHT sensors. 3. Demonstrate IoT based case study. 4. Implement storing of data to AWS. 5. Write accurate documentation for experiments performed. 6. Apply ethical principles like timeliness and adhere to laboratory.	

Lab No.	Experiment Title	LO mapped	Hrs./Lab
I.	Lab Prerequisite		2
1.	LED and IR sensor interfacing with Nodemcu.		2
2.	Ultrasonic sensor interfacing with Nodemcu for distance measurement.	LO1, LO5, - LO6	2
3.	Temperature/Humidity monitoring using Blynk App.		2
4.	DHT sensor interfacing with Nodemcu and communication of data using MQTT protocol/ Rabbit MQ.		2
5.	To study the MQTT and ThingSpeak and upload the DHT sensor data on ThingSpeak		2
6.	To study Amazon Web Service Platform.	LO4, LO5, LO6	2
7.	Study of IoT based industrial process monitoring and control system	LO3, LO5,	2
8.	Case Study -I	LO6	2
9.	Case Study -II		4

Guidelines for Minor Project:

- 1. Project is a group activity and students shall form a group of 2 to 3 students. A group shall not be more than three students.
- 2. Project Based Learning Minor Project Lab-1 should be implemented with hardware and/or software.
- 3. Students will be assigned an open-ended problem which they will finalize according to their preferences and in consultation with the faculty supervisor.
- 4. Project should be implementation of Applied Artificial Intelligence/ Data Science/Embedded Systems/ Societal need based / Innovative idea implementation etc.
- 5. Students shall submit an implementation plan in the form of Gantt/PERT/CPM chart, which will cover weekly activity of mini projects.
- 6. A collaborative logbook will be prepared by each group, which will be verified regularly by; guide/supervisor can verify and record notes/comments.
- 7. The solution to be validated with proper justification and report to be compiled in standard format of the college.
- 8. The focus of project will be on self-learning, innovation, addressing societal problems and based solutions

Guidelines for Assessment of Minor Project:

- 1. The review/ progress monitoring committee shall be constituted by faculty members in-charge and/or senior faculty members.
- 2. The progress of the mini project to be evaluated on a continuous basis, minimum two reviews per semester. Assessment also considers peer review by students and observation of ethics.
- 3. Report should be prepared as per the guidelines issued by the college.
- 4. Mini Project shall be assessed through a presentation and demonstration of working model by the student project group to a panel of examiners.
- 5. In the case of a major project, the evaluation will be based on fulfillment of goals by the end of semester. Students shall be motivated to participate in poster & project competition.

Term work (25 Marks):

Distribution of term work marks are.

1. Marks awarded by guide/supervisor based on logbook: 10

- 2. Marks awarded by review committee (Internal Presentation and TPP/Poster/ Idea Competition/etc. Participation): 10
- 3. Quality of Project report: 05

Practical (25 Marks):

- 1. Minor Projects shall be assessed through a presentation and demonstration of working model by the student project group to a panel of Internal and External Examiners preferably from industry or research organizations having experience of more than five years approved by head of Institution.
- 2. Students shall be motivated to publish a paper based on the work in Conferences/students competitions

Distribution of practical marks are,

- 1. Presentation:5
- 2. Project Implementation:10
- 3. Project Report, Performance:10

Exposure (Skill Based Learning-IX) Code	Exposure (Skill Based Learning-IX) Credits (P+T)			
AIXS69	R Programming	(1+0)		
Prerequisite:	Engineering Mathematics			
Skill Objectives:	1. Identify and use available R packages a	nd associated Open Source		
	software			
	2. Write efficient programs using R to perform	m routine tasks		
	3. Document and collaborate on code development			
	4. Work with datasets for analysis and presentation			
Skill Outcomes (SOs):	1 1 5			
	2. Import different data formats into R using	RStudio.		
	3. Wrangle data for analysis.			
	4. Query data using SQL and R.			
	5. Analyze a data set in R and present findi	ngs using the appropriate R		
	packages.			
	6. Visualize data attributes using ggplot2 and	l other R packages.		

Module No. & Name	Sub Topics	SO Mapped	Hrs/ Subtopic
1.Getting Started with R	What is R? • Installing R and RStudio • RStudio Overview • Working in the Console • Arithmetic Operators • Logical Operations • Using Functions • Getting Help in R and Quitting RStudio	SO1	02
2.Basics of R	Atomic classes, Creating Variables • Numeric, Character and Logical Data, vectors, lists, factors, missing values, data frames and matrices, Special Values		02
3.Reading and storing data	Use read.table() for small and large data, calculating memory requirements, Using the readr Package, using file() connections, using textual and binary formats to store data	SO2	02
4.Data structures	Subsetting vector, matrix, lists, nested elements, multiple elements, removing NA values, Managing data frames with the dplyr package		02
5.Control structures	Control structures like if, while, and for, repeat		02
6.Functions	Functions, argument matching, evaluation, Looping the command line	SO3	02
7.Regular expressions	<pre>grep(), grepl(), regexpr(), sub(), gsub(),regexec(), the stringer package</pre>	SO4	02
8.Data exploration and visualization	Using the ggplot2 package to visualize data • Applying themes from ggthemes to refine and customize charts and graphs • Building data graphics for dynamic reporting	SO5	02
9.Debugging and profiling	Debugging tools, R profiler		02
10.Simulation	Simulating random and linear models	SO6	02
11. Data analysis case study	Data analysis and case study		02

Exposure (Technology Based

Guidelines:

Exposure (Technology Based

- 1. Learners should enroll for an online course based on their area of interest concerning emerging areas of technology in consultation with Faculty Supervisor nominated by the Head of Department.
- 2. The course duration should be of minimum 04 weeks.
- 3. Students should watch all the videos of the course to learn the course in-depth and entirety.
- 4. Students should solve weekly assignments that are to be submitted online within the prescribed deadline.
- 5. Students should register and appear for the course certification exam on scheduled date and time.
- 6. Students should submit the certificate of course completion to the Faculty Supervisor.
- 7. Faculty Supervisor shall monitor students' participation and progress at every stage from course enrolment to certification.

Term Work:
Term work shall be conducted for total 25 marks

Course Code	Course Name	Hours/Duration				
INT65	Internship-V	2-4 Weeks				
D		1.				
Prerequisite:	List of probable industries and organizations offering internships on live projects. Awareness about probable solutions for identified problem areas in					
Course Objectives:	1. To understand the social, economic and administrative considerations 2. Learn to apply the Technical knowledge for solving real life problems.					
Course	Upon completion of the course, students will be able to:					
Outcomes:	 Get an opportunity to get hired by the Industry/ organization. Decide if working in the industry or set up a start-up would be best career option to pursue. 					
Activity- Rural Supporting Activities to be completed under Internship						
Internships	1. Long Term Goal under Rural Development Internships or					
& Internships	2. Mandatory internship for developing project with:					
	• Industries					
	Government Sector					
	Non-governmental Organization (NGO)					
	• MSMEs					

Week Ends/ Semester Break/End of Semester (After ESE & Before Next Term Start)

Guidelines:

- 1. Batch wise Faculty Supervisor who is the proctor (mentor) of the batch will be allotted as in-charge for the course, at start of the Academic year.
- 2. Students will submit the participation certificate of the activities to the faculty mentors.
- 3. For working in cells related activities, Cell coordinator will submit list of actively involved & participated students of each department, semester wise to all department HODs, verified and authenticated by Dean Students Welfare.
- 4. HODs will circulate the student list to all faculty mentors for consideration of Hours spends under mentioned department activities.
- 5. Department IIIC Cell coordinator will collect, maintain each student proofs/reports from all faculty mentors, department internship analysis report will be prepared & submitted to Dean, IIIC for AICTE-CII survey data
- 6. Students will submit evaluation sheet by attaching Xerox copies of all participation/ IPR/ Copyright certificates & faculty mentor will verify it with original copies, for assessment purpose.

Honours Degree Program Manual

(Prepared based on the Guidelines for AICTE and University of Mumbai)

For

- 1. Computer Engineering
- 2. Information Technology
- 3. Electronics & Telecommunication Engineering
- 4. Artificial Intelligence & Data Science

(with effect from AY 2022-2023)

K J Somaiya Institute of Technology

An Autonomous Institute affiliated to University of Mumbai

ACADEMIC YEAR 2022-23

Honours Degree Programs in Engineering and Technology Manual

Introduction:

As per the AICTE's Approval Process Handbook-2020-21: Chapter VII- clause 7.3.2 (Page 99-101) and APH 2021-22, all branches of Engineering and Technology shall offer Elective Courses in the EMERGING AREAS viz., Artificial Intelligence (AI), Internet of Things (IoT), Blockchain, Robotics, Quantum Computing, Data Sciences, Cyber Security, 3D Printing and Design, Augmented Reality/ Virtual Reality (AR/VR), as specified in Annexure 1 of the Approval Process Handbook.

- a) Under Graduate Degree Courses in EMERGING AREAS shall be allowed as specialization from the same Department. The minimum additional Credits for such Courses shall be in the range of 18-20 and the same shall be mentioned in the degree, as specialization in that particular area. For example, doing extra credits for Robotics in Mechanical Engineering shall earn B.E./ B.Tech. (Hons.) Mechanical Engineering with specialization in Robotics
- b) Minor specialization in EMERGING AREAS in Under Graduate Degree Courses may be allowed where a student of another Department shall take the minimum additional Credits in the range of 18-20 and get a degree with minor from another Department.

It is also made very clear by AICTE that areas in which Honours Degree may be offered are numerous. It is up to the Universities with the help of their Academic Board/Council to decide whether Honours. Degree is to be offered or not in any particular area, which is not mentioned above. The criteria for "Honours. Degree will cumulatively require additional 18 to 20 credits in the specified area in addition to the credits essential for obtaining the Under Graduate Degree in Major Discipline (i.e. 169 credits of KJSIEIT)"

1. Honours Degree under KJSIT:

Honours degree program is introduced in order to facilitate the students to choose additionally the specialized courses in the emerging areas of their choice and build their competence in such domains. Based on AICTE guidelines, KJSIT has proposed to offer following Honours degree program corresponding to each engineering program as shown in Table 1.

Table 1: Honours Degree Programs

Sr. No.	Honours degree programs	
1	Artificial Intelligence and Machine Learning	
2	Blockchain	
3	Cyber Security	
4	Augmented and Virtual Reality	
5	Data Science	
6	Internet of Things (IoT)	

2. Honours Degree Eligibility Criteria for Students:

In view of the above-mentioned guidelines issued by AICTE in APH 2020-21 and APH 2021-22 for offering Honours degree in the various engineering programs, the following recommendations are proposed on the eligibility criteria for students opting for same;

- i) Eligibility criteria for opting the Honours Degree program:
- a. Students with no backlog in semester I, II, and III
- b. The CGPI (based on semester I, II, and III) of the students must be 6.75 and above
- c. For direct second year (DSE) admitted students No backlog in semester III and CGPI must be 6.75 and above
- ii) Each eligible student can opt for maximum one Honour's Programs at any time.
- iii) Students registered for Honours Degree Program need to complete (clear/pass) Honours Degree along with regular B Tech degree to get benefit of Award of Honours along with B Tech Degree. Students with clear pass out in regular B Tech program and having ATKT in Honours program; will only be awarded with regular B Tech degree.
- iv)However it is optional (not the compulsion) for eligible students to take additional honours degree program.
- v) Student shall complete Honors degree program in the stipulated four semesters only.

3. Examination and Evaluation of Honours Degree Courses:

Hons degrees courses will be offered in Third and Final Year of engineering as specialisation in emerging areas. Modalities for Examination and Evaluation will be,

- a. The continuous assessment (CA= Average of 2 tests+ Internal Assessment (IA)) and End Sem. Examination (ESE) evaluation shall follow the same pattern as adopted for corresponding semester stated by the University/ Autonomous Institute.
- b. End semester Assessment will be done as per the laid down practices by following all applicable ordinances and regulations of University of Mumbai/Rules stated in Manual of KJSIEIT.
- c. Hons. degree courses can be treated as Audit type of courses, wherein passing marks set will be 40. If any student scored equal or more than passing marks in particular course can be declared as pass.
- d. Grading of courses offered under Honours degree shall be avoided and also not included in overall CUMMULATIVE GRADE POINT AVERAGE, to bring parity with all students admitted for the basic program.
- e. Hons, degree shall be conferred in addition to basic degree only after successfully completion of all courses.
- f. Institute can make provision for entering pass or fail in course offered under Honours degree.

4. Award of Honours Degree Program:

The students successfully completing the Honours Degree shall be awarded with the degree designated as: "B. Tech. (Engineering) (Hons. - Specialization)"

Example 1: Students s successfully completing B Tech in Computer Engineering with specialization (Honours) in Cyber Security shall get a degree as "B Tech (Computer Engineering) (Hons. - Cyber Security)"

Example 2: Students successfully completing B Tech in Electronics and Telecommunication Engineering with specialization in Internet of Things (IoT) shall get a degree as

"B Tech (Electronics and Telecommunication Engineering) (Hons.- Internet of Things)"

5. <u>Honours Degree Program Scheme and Structure:</u>

Honours degree program be offered from academic year 2022-23 onwards along with KJSIEITs Autonomous Scheme II syllabus.

Honours credit courses will be offered from Semester V onwards to Semester VIII as shown in Table 2.

Table 2: Honours degree Program credit and Examination Scheme

Continuous Assessment (CA):

The distribution of Continuous Assessment marks will be as follows –

1.	Class Test 1	30 marks
2.	Class Test 2	30 marks
3.	Internal Assessment	10 marks

Assessment:

Continuous Assessment (30-Marks): Test-1 and Test-2 consists of two class tests of 30 marks each. Test-1 is to be conducted on approximately 40% of the syllabus completed and Test-2 will be based on remaining contents (approximately 40% syllabus but excluding contents covered in Test-1). Duration of each test shall be one hour.

Internal Assessment(IA):

Marks will be allotted as per designed rubrics.

End Semester Theory Examination will be of 60-Marks with Three hour duration.

Term Work:

The Term work shall consist of at least 10 to 12 practical based on the above syllabus. The term work Journal must include at least 2 assignments. The assignments should be based on real world applications which cover concepts from all above syllabus.

Term Work Marks: 50 Marks (Total marks) = 40 Marks (Experiment) + 5 Marks (Assignments/tutorial/write up) + 5 Marks (Attendance)

Oral Exam: An Oral exam will be held based on the above syllabus.

Continuous Assessment (CA):

The distribution of Continuous Assessment marks will be as follows –

1.	Class Test 1	30 marks
2.	Class Test 2	30 marks
3.	Internal Assessment	10 marks

Assessment:

Continuous Assessment (30-Marks): Test-1 and Test-2 consists of two class tests of 30 marks each. Test-1 is to be conducted on approximately 40% of the syllabus completed and Test-2 will be based on remaining contents (approximately 40% syllabus but excluding contents covered in Test-1). Duration of each test shall be one hour.

Internal Assessment(IA):

Marks will be allotted as per designed rubrics.

Prerequisite: Lab Objectives: The Lab aims: 1. To identify security vulnerabilities applications. 2. To discover potential vulnerabilities network using vulnerabilities in a system. 3. To identify threats by exploiting the utilizing the vulnerabilities in a system. 4. To recognize how security controls of gaining access controls to database. 5. To test and exploit systems using various system logs. 6. To write a report with a full understar what work is necessary to both fix the same source of vulnerabilities in the fut. Lab Outcomes: Sr. No. Lab Outcomes On successful completion, of lab, learner/ 1 Understand the structure where assessment is to be performed. 2 Apply assessment tools to identify present in the system in network. 3 Evaluate attacks by executing pene the system or network. Analyse a secure environment security controls and applying mechanisms for unauthorised access to using various tools and remove hacking in system. 6 Create security by testing and evaluation of documents as per applying the security controls of documents as per apply of vulnerabilities of assessment as testing. Lab. No. and Module Name	Experiment Title	LO mapped	Hrs/ Lab	Total Hrs. /Module
I. Prerequisite	Computer Network, Basics of Network Security, Ethical Hacking, Digital Forensics		2	2
1. Human Security (Social Engineering) Assessment	Visibility Audit: Collecting information through social media and internet. Collecting contact details (like phone number, email ID, What's App ID, etc) Active Detection Verification: Test if the phone number, email id etc are real by test message. Test whether the information is filtered at point of reception. Test if operator / person assistance can be obtained. Device Information: IP Address, Port details, Accessibility, Permissions, Role in business Trust Verification: Test whether the information can be planted in form of note / email / Message (Phishing) Test Subjects: College Staff, Reception, PA to Director / Principal. To conduct information gathering to conduct social engineering audit on various sections in your college. Self-Learning Topics: Networking Commands	LO1	8	8
2. Network & Wireless Security Assessment	Network Discovery: Using various tools to discover the various connected devices, to get device name, IP Address, relation of the device in network, Detection of Active port, OS Fingerprinting, Network port and active service discovery Tools: IP Scanner, Nmap etc Network Packet Sniffing: Packet Sniffing to detect the traffic pattern, Packet capturing to detect protocol specific traffic pattern, Packet capturing to reassemble packet to reveal unencrypted password Tools: Wireshark Self-Learning Topics: Learning the CVE database for vulnerabilities detected.	LO2	8	8
3. Setting up Pentester lab	Including an attacker machine preferably Kali and in the same subnet victim machines either DVWA/SEEDlabs/ multiple VULNHUB machines as and when required. Understanding Categories of pentest and legalities/ ethics. Installed Kali machine on VM environment with some VULNHUB machines and we can find out vulnerability of Level 1-VULNHUB machine like deleted system files, permissions of files. Self learning Topics: Vulnerability exploitation for acquire root access of the Kioptrx machine	LO3	9	9
4. Database and Access Control Security Assessment	Database Password Audit: Tool based audit has to be performed for strength of password and hashes. Tools: DBPw Audit Blind SQL Injection: Test the security of the Database for SQL Injection	LO4	9	9

	Tools: BSQL Hacker Password Audit: Perform the password audit on the Linux / Windows based system Tools: Cain & Able, John the ripper, LCP Password Auditing tools for Windows. Active Directory and Privileges Audit: Conduct a review of the Active Directory and the Group Policy to assess the level of access privileges allocated. Tools: SolarWinds Self-Learning Topics: Federated Database security challenges and solutions. Conduct a log analysis on Server Event Log /				
5. Log Analysis	Firewall Logs / Server Security Log to review and obtain insights Tools: graylog, Open Audit Module. Self-Learning Topics: Python and R-Programming scripts	LO5	6	6	
6. Compliance and Observation Reporting	License Inventory Compliance: Identify the number of licenses and its deployment in your organization. Tools: Belarc Advisor, Open Audit Report Writing: NESSUS tool Report should contain: a. Vulnerability discovered b. The date of discovery c. Common Vulnerabilities and Exposure (CVE) database reference and score; those vulnerabilities found with a medium or high CVE score should be addressed immediately d. A list of systems and devices found vulnerable e. Detailed steps to correct the vulnerability, which can include patching and/or reconfiguration of operating systems or applications f. Mitigation steps (like putting automatic OS updates in place) to keep the same type of issue from happening again Purpose of Reporting: Reporting provides an organization with a full understanding of their current security posture and what work is necessary to both fix the potential threat and to mitigate the same source of vulnerabilities in the future. Self-Learning Topics: Study of OpenVAS, Nikto, etc.	LO6	10	10	
		Total h	ours	52

Term Work:

The Term work shall consist of at least 10 to 12 practical based on the above syllabus. The term work Journal must include at least 2 assignments. The assignments should be based on real world applications which cover concepts from all above syllabus.

Term Work Marks: 50 Marks (Total marks) = 40 Marks (Experiment) + 5 Marks (Assignments/tutorial/write up) + 5 Marks (Attendance)

Practical & Oral Exam:

An Oral & Practical exam will be held based on the above syllabus.

Continuous Assessment (CA):

The distribution of Continuous Assessment marks will be as follows –

1.	Class Test 1	30 marks
2.	Class Test 2	30 marks
3.	Internal Assessment	10 marks

Assessment:

Continuous Assessment (30-Marks): Test-1 and Test-2 consists of two class tests of 30 marks each. Test-1 is to be conducted on approximately 40% of the syllabus completed and Test-2 will be based on remaining contents (approximately 40% syllabus but excluding contents covered in Test-1). Duration of each test shall be one hour.

Internal Assessment(IA):

Marks will be allotted as per designed rubrics.

Term Work:

The Term work shall consist of at least 10 to 12 practical based on the above syllabus. The term work Journal must include at least 2 assignments. The assignments should be based on real world applications which cover concepts from all above syllabus.

Term Work Marks: 50 Marks (Total marks) = 40 Marks (Experiment) + 5 Marks (Assignments/tutorial/write up) + 5 Marks (Attendance)

Practical & Oral Exam:

An Oral & Practical exam will be held based on the above syllabus.

Continuous Assessment (CA):

The distribution of Continuous Assessment marks will be as follows –

1.	Class Test 1	30 marks
2.	Class Test 2	30 marks
3.	Internal Assessment	10 marks

Assessment:

Continuous Assessment (30-Marks): Test-1 and Test-2 consists of two class tests of 30 marks each. Test-1 is to be conducted on approximately 40% of the syllabus completed and Test-2 will be based on remaining contents (approximately 40% syllabus but excluding contents covered in Test-1). Duration of each test shall be one hour.

Internal Assessment(IA):

Marks will be allotted as per designed rubrics.

Course Code	Course Name		Credits Assigned (TH+P+TUT)		
HIOTSBL601	Inter	facing & Programming with IoT Lab (SBL)	0+04+0		
Prerequisite:	IoT introduction course: Basics of IoT, Introduction to Embedded systems				
Lab Objectives:	The Lab aims:				
	1. To Understand the definition and significance of the Internet of Things.				
		2. To Discuss the architecture, operation, and business benefits of an IoT			
		solution. 7. To Everning the potential business apportunities that IoT can uncover			
		3. To Examine the potential business opportunities that IoT can uncover.4. To Explore the relationship between IoT, cloud computing, and DevOps.			
	5. To Identify how IoT differs from traditional data collection systems.				
	6. To Explore the interconnection and integration of the physical world and				
	able	to design & develop IOT Devices.			
Lab Outcomes:			Cognitive levels of

Hardware & Software Requirements:

Hardware & Bottware Requirements.					
Hardware Requirements	Software Requirements	Other Requirements			
PC With Following Configuration	1. Windows or Linux	1. Internet Connection.			
1. Intel PIV Processor	Desktop OS				
2. 4 GB RAM	2. DeVops				
3. 500 GB Harddisk	3.Python				
4. Network interface card	4. IoT Simulator/Emulator				
5. Sensors	(open source)				
6. IoT Kit (Arduino/ARM/Raspberry Pi)					

This lab will describe the market around the Internet of Things (IoT), the technology used to build these kinds of devices, how they communicate, how they store data, and the kinds of distributed systems needed to support them. Divided into four main modules, we will learn by doing. We will start with simple examples and integrate the techniques we learn into a class project in which we

design and build an actual IoT system. The client will run in an emulated ARM environment, communicating using common IoT protocols with a cloud enabled backend system with DevOps integration.

Lab. No.	Experiment Title	LO mapped	Hrs/Lab
1	To study and implement interfacing of different IoT sensors with Raspberry Pi/Arduino/ModeMCU	LO1	4
2	To study and implement interfacing of actuators based on the data collected using IoT sensors. (like led switch ON/OFF, stepper word)	LO2	4
3	To study and demonstrate Contiki OS for RPL (like Create 2 border router and 10 REST clients, Access border router from other network (Simulator))	LO3	4
4	To study and demonstrate use of IoT simulators (like Beviswise) on any real time device (LED/stepper motor)	LO3	4
5	Select any one case study (in a group of 2-3) and perform the experiments 5 to 10. The sample case studies can be as follows: 1. Smart home automation system 2. Healthcare management system 3. Smart traffic management system & so on Write a program on Raspberry Pi to push and retrieve the data from cloud like thingspeak, thingsboard, AWS, Azure etc.	LO4	8
6	To install MySQL database on Raspberry Pi and perform basic SQL queries for analysis data collected.	LO4	6
7	To study and implement IoT Data processing using Pandas.	LO4	4
8	To study and implement Continuous Integration using Jenkins on IoT data and also perform interfacing of Raspberry Pi into Jenkins.	LO6	6
9	To study and implement Continuous Deployment (Infrastructure as a code) for IoT using Ansible.	LO6	6
10	To study MQTT Mosquitto server and write a program on Arduino/Raspberry Pi to publish sensor data to MQTT broker.	LO5	6

Continuous Assessment (CA):

The distribution of Continuous Assessment marks will be as follows –

1.	Class Test 1	30 marks
2.	Class Test 2	30 marks
3.	Internal Assessment	10 marks

Assessment:

Continuous Assessment (30-Marks): Test-1 and Test-2 consists of two class tests of 30 marks each. Test-1 is to be conducted on approximately 40% of the syllabus completed and Test-2 will be based on remaining contents (approximately 40% syllabus but excluding contents covered in Test-1). Duration of each test shall be one hour.

Internal Assessment(IA):

Marks will be allotted as per designed rubrics.

End Semester Theory Examination will be of 60-Marks with Three hour duration.

Internship Manual

(Prepared based on the Guidelines of AICTE and University of Mumbai)

(with effect from AY 2022-2023)

K J Somaiya Institute of Technology

An Autonomous Institute affiliated to University of Mumbai

Academic Year 2022-23

INTERNSHIP MANUAL

AICTE-INTERNSHIP POLICY STATES THAT:

- The rise in global competition has prompted organizations to devise strategies to have a talented and innovative workforce to gain a competitive edge.
- Developing an internship policy is an impactful strategy for creating a future talent pool for the industry.
- The Internship program not only helps fresh pass-outs in gaining professional know-how but also benefits, corporate on fresh perspectives on business issues and even discovering future business leaders.
- Competition in the job sector is rising exponentially and securing entry-level jobs is getting very difficult, as the students passing out from technical institutions lack the experience and skills required by industry.
- The main aim of this initiatives is enhancement of the employability skills of the students passing out from Technical Institutions.

OBJECTIVES & EXPECTED OUTCOMES:

Following are the intended objectives of internship training:

- 1. Will expose Technical students to the industrial environment, which cannot be simulated in the classroom and hence creating competent professionals for the industry.
- 2. Provide possible opportunities to learn, understand and sharpen the real time technical / managerial skills required at the job.
- 3. Exposure to the current technological developments relevant to the subject area of training.
- 4. Experience gained from the 'Industrial Internship' in the classroom will be used in classroom discussions.
- 5. Create conditions conducive to quest for knowledge and its applicability on the job.
- 6. Learn to apply the Technical knowledge in real industrial situations.
- 7. Gain experience in writing Technical reports/projects.
- 8. Expose students to the engineer's responsibilities and ethics.
- 9. Familiarize yourself with various materials, processes, products and their applications along with relevant aspects of quality control.
- 10. Promote academic, professional and/or personal development.
- 11. Expose the students to future employers.
- 12. Understand the social, economic and administrative considerations that influence the working environment of industrial organizations.
- 13. Understand the psychology of the workers and their habits, attitudes and approach to problem solving.

BENEFITS OF INTERNSHIP:

Benefits to Students:

- 1. An opportunity to get hired by the Industry/ organization.
- 2. Practical experience in an organizational setting.
- 3. Excellent opportunity to see how the theoretical aspects learned in classes are integrated into the practical world. On-floor experience provides much more professional experience which is often worth more than classroom teaching.
- 4. Helps them decide if the industry and the profession is the best career option to pursue.
- 5. Opportunity to learn new skills and supplement knowledge.
- 6. Opportunity to practice communication and teamwork skills.
- 7. Opportunity to learn strategies like time management, multi-tasking etc in an industrial setup.
- 8. Opportunity to meet new people and learn networking skills.
- 9. Makes a valuable addition to their resume.
- 10. Enhances their candidacy for higher education.
- 11. Creating networks and social circles and developing relationships with industry people.
- 12. Provides opportunity to evaluate the organization before committing to a full time position.

Benefits to the Institute:

- Build industrial relations.
- Makes the placement process easier.
- Improve institutional credibility & branding.
- Helps in retention of the students.
- Curriculum revision can be made based on feedback from Industry/ students.
- Improvement in teaching learning process.

Benefits to the Industry:

- Availability of ready to contribute candidates for employment.
- Year round source of highly motivated pre-professionals.
- Students bring new perspectives to problem solving.
- Visibility of the organization is increased on campus.
- Quality candidate's availability for temporary or seasonal positions and projects.
- Freedom for industrial staff to pursue more creative projects.
- Availability of flexible, cost-effective work force not requiring a long-term employer commitment.
- Proven, cost-effective way to recruit and evaluate potential employees.
- Enhancement of employer's image in the community by contributing to the educational enterprise.

STANDARD OPERATING PROCEDURE (SOP) FOR INTERNSHIP:

The general procedure for arranging internship is given below:

Step 1: Request Letter/ Email from the Dean, IIIC/ HOD and/or IIIC members of resp. depts. of the college shall be send to industry to allot various slots of 4-6 weeks during summer vacation as internship periods for the students. Students request letter/profile/ interest areas may be submitted to industries for their willingness for providing the training. (Sample attached)

Step 2: Industry will confirm the training slots and the number of seats allocated for internships via Confirmation Letter/ Email. In case the students arrange the training themselves the confirmation letter will be submitted by the students to Dean, IIIC/ HOD and/or IIIC members of resp. depts. Based on the number

of slots agreed to by the Industry, Dean, IIIC/ HOD and/or IIIC members will allocate the students to the Industry. In addition, the internship slots may be conveyed through Telephonic or Written Communication (by Fax, Email, etc.) by the Dean or other members of the IIIC who are particularly looking after the Internship of the students.

Step 3: Students on joining Training at the concerned Industry / Organization, submit the Joining Report/Letters / Email.

Step 4: Students undergo industrial training at the concerned Industry / Organization. In-between Faculty Member(s) evaluate(s) the performance of students once/twice by visiting the Industry/Organization and Evaluation Report of the students is submitted to Department IIIC Member with the consent of Industry persons/ Trainers.

- **Step 5:** Students will submit a training report after completion of internship.
- **Step 6:** Training Certificate to be obtained from industry.
- **Step 7:** List of students who have completed their internship successfully certificate will be issued by Departments, Sections, Professional bodies, Cells, Committees in collaboration with IIIC cell.

Step 8: In addition to Step 1 to Step 7, Departments, Sections, Professional bodies, Cells, Committees of KJSIT may organize in house / Industry collaborated internship of 1/2/3/4 weeks duration for students with the same procedure as stated above, with in Principal approval from Principal.

GUIDELINES FOR THE STUDENTS:

Internship/ Placement is a student centric activity. Therefore, the major role is to be played by the students. Deans, IIIC/HOD may also include involvement of the student in the following activities:

- Design and Printing of Internship / Placement Brochure Soft copy as well as Hard copy.
- Preparing list of potential recruiters / Internship providers and past recruiters.
- Internship/ Placement Presentation at various organizations, if required.
- For allotment of internship slots all the students will be required to submit "student internship program application" before the prescribed date

SOP FOR INTERNSHIP REPORT:

STUDENT'S DIARY/DAILY LOG:

The main purpose of writing a daily diary is to cultivate the habit of documenting and to encourage the students to search for details. The students should record in the daily training diary the day to day account of the observations, impressions, information gathered and suggestions given, if any. It should contain the sketches & drawings related to the observations made by the students. The diary should also be shown to the Faculty Mentor from time to time. Student's Diary and Internship Report should be submitted by the students along with attendance record and an evaluation sheet duly signed, if any. It will be evaluated on the basis of the following criteria:

- Regularity in maintenance of the diary.
- Adequacy & quality of information recorded.
- Drawings, sketches and data recorded.
- Thought process and recording techniques used.
- Organization of the information.

After completion of Internship, the student should prepare a comprehensive report to indicate what he/she has observed and learnt in the training period. The training report should be signed by the Internship Supervisor (from Industry/Organisation, if applicable), Faculty Incharge and HOD. The Internship report

will be evaluated on the basis of following criteria:

- Originality.
- Adequacy and purposeful write-up.
- Organization, format, drawings, sketches, style, language etc.
- Variety and relevance of learning experience.
- Practical applications, relationships with basic theory and concepts taught in the course. The industrial training of the students will be evaluated in three stages:
- Evaluation by Industry
- Evaluation by faculty supervisor on the basis of site visit(s).
- Evaluation through seminar presentation/viva-voce at the Institute.

EVALUATION BY INDUSTRY:

The industry will evaluate the students based on the Punctuality, eagerness to learn, Maintenance of Daily Diary and skill test in addition to any remarks.

EVALUATION THROUGH SEMINAR PRESENTATION/VIVA-VOCE AT THE INSTITUTE:

The student will give a seminar based on his/her internship/ training report, as decided by the institute. The evaluation will be based on the following criteria:

- Quality of content presented.
- Proper planning for presentation.
- Effectiveness of presentation.
- Depth of knowledge and skills.
- Attendance record, daily diary, departmental reports shall also be analyzed along with the Internship Report. Seminar presentation will enable sharing knowledge & experience amongst students & teachers and build communication skills and confidence in students.

EXAMINATION AND EVALUATION FOR AWARD OF INTERNSHIP COMPLETION CERTIFICATE

Internship Completion certificate will be awarded to graduating students on completion of minimum 5 Internship modules from Semester 2 to Semester 8 as per the internship policy document.

COMPLIANCES FOR INTERNSHIP COMPLETION CERTIFICATION:

- 1. Completion of 1 internship module will reflect addition of 2 credits so total credits e arned will be 2 credits x 7 internship modules = 14 credits across Semester 2 to Semester 8.
- 2. Mandatory to complete minimum 5 internship modules across Semester 2 to Semester 8 for award of Internship Certificate.
- 3. On completion of 5 Internship modules credit earned = 10
- 4. On completion of 6 Internship modules credit earned = 12
- 5. On completion of 7 Internship modules credit earned =14
- 6. No credits will be awarded AND / OR No Internship Completion Certificate will be issued for less than 10 credits earned throughout the degree.
- 7. Internship evaluation will be as per Internship module assessment process defined in Internship Manual course contents, for every individual student across Semester 2 to Semester 8.
- 8. Departments will submit Internship completion report and credits assigned sheet of every student signed by Department internship coordinator, Class teachers and Head of the Department to Exam Cell

- during 8th Semester ESE time duration of respective batch to generate the internship completion certificate along with the regular grade sheet.
- 9. No further queries will be entertained if not meeting above compliances and not following the internship modules designed under the guidelines of AICTE Internship policy.

Internship Scheme & Structure under KJSIT Autonomy Scheme-II B wef 2022-23 for Bachelor of FY/SY/TY/LY (CE/IT/AI/ET Technology) Semester- II-VIII

Note:

As per guidelines and suggestions by AICTE-Internship policy

- 1 Credit = 40 45 hours of Internship
- Total 600-700 hour of spending under Internship module courses to be completed for award of Internship Completion Certification along with regular passing gradesheet. (e.g. Total 15 weeks of 5 days/week of 8 hrs/day spent=600hrs for complete degree duration)
- Total weeks of Internship shall be considered based on Hrs spent/Day
- For Internship course, No load to be allotted for mentors in faculty load distribution sheet.

Internship Modules & Contents Across Semester 2 to Semester 8

Internship Code	Course Name	Hours/Duration	Credits		
INT21	Internship-I	80-120 hrs (2-3 Weeks) Winter Vacation After SEM-I & during SEM-II of FY	02		
Prerequisite:	Fundamental kn	owledge of Engineering and Technology			
Internship Objectives:	 To get acquainted with institute level technical activities and initiatives. To participate in department/Institute level technical learning and training initiatives through Professional cells/clubs/committees/bodies. 				
Internship Outcomes:	Upon completion of the course, students will be able to: 1. Get practical experience of institutional setting. 2. Meet and interact with new people and learn networking, innovation a entrepreneurial skills. 3. Promote academic, professional and/or personal development.				
	Supporting Activ	rities to be completed under Internship			
A 4	Attending Industry Workshops organised by departments				
Activity- Inter/Intra	Working in consultancy or research project initiated by department				
Institutional	Technical festival (participation)				
Activities	Working in IIC Cell, Entrepreneurship Cell, NISP, IPR cell and/or any other technical professional body/cell/committee/club of the institute				
	Activities related to Incubation or Innovation				
	Learning in departmental Labs, Tinkering Lab				

Term Work Assessment: Duration to be considered for assessment: Week Ends/ Semester Break/End of Semester (After ESE & Before Next Term Start) 1. Batch wise Faculty Supervisor who is the proctor (mentor) of the batch will be allotted as in-charge for the course, at start of the Academic year. **Guidelines:** Students will submit the participation certificate of the activities to the faculty 3. For working in cells related activities, Cell coordinator will submit list of actively involved & participated students of each department, semester wise to all department HODs, verified and authenticated by Dean Students Welfare. 4. HODs will circulate the student list to all faculty mentors for consideration of Hours spends under mentioned department activities. 5. For department Lab learning, FY HOD will circulate Term End report to all faculty mentors with list of student's undergone innovative learning, verified by department academic coordinator. 6. Students will submit evaluation sheet by attaching Xerox copies of Internship & other participation certificates & faculty mentor will verify the Xerox from original copy for assessment purpose. TW Marks (25) & **Assessment & evaluation based on rubrics:**

& Internship and Activity Completion/Participation Certificates and Evaluating

Hours Spent for Internship: max 20 marks

Achievement/Recognition: max 05 marks
